ACKNOWLEDGMENTS

I am indebted to many people who assisted me in seeing this work through to completion. The text has been based on field notes and pictures from the Archives of the Turkish-Italian archaeological expedition to Tilmen Höyük owned by Alma Mater Studiorum – University of Bologna, access to which has been generously granted by Nicolò Marchetti, director of the expedition. Excavation and survey notes were by Luciano Cuccui (area K-1, area P-2007); Alessia Bontempo (area K-3); Massimo Zanfini (casemates north) and by the present author (area P2, area P-2006). A first commentary on the K-3 Excavation Area was elaborated by E. Guerri in her graduate school dissertation: her remarks provided an additional insight for the current analysis. Plans and sections have been compiled by Mar-co Valeri from original drawings by Massimo Zanfini and Paolo Luglio. Pottery drawings and digital inking of the potsherds are by Kevin Ferrari. Pietro Baldassarri elaborated and implemented the online interrelated database. Karsten Schoellner provided the English proofreading of the manuscript. To all of them, I would like to express my sincere appreciation and gratitude. Special thanks go to Vittoria Cardini and Giacomo Casucci for their constant assistance. Vittoria Cardini arranged the plates, helped in the compilation of the database sheets, and took care of the graphical editing of the volume; Giacomo Casucci arranged the pottery figures, and the distributional charts and diagrams of the potsherds. Thanks are also due to Alessandro Colantoni, Costanza Coppini and Anacleto D'Agostino for useful discussion on the Middle and Late Bronze Age pottery. I am also indebted to Dominik Bonatz, director of the Institut für Vorderasiatische Archäologie at the Freie Universität Berlin, for the essential research period spent in 2019 at the Institute. I express my warmest gratitude to the colleagues of the Directorate General for Museums and Cultural Heritage in Ankara. I am also indebted to the Directorships of the Gaziantep Museum and the Gaziantep Regional Committee for the Conservation of Cultural Heritage. My deepest thanks go to Nicolò Marchetti who gave me the opportunity to work on such an interesting subject and encouraged me throughout. The compilation of the report was made possible by a generous grant from the Shelby White and Leon Levy Program for Archaeological Publications.
